

Android Application for Layout Managers and Event Listeners

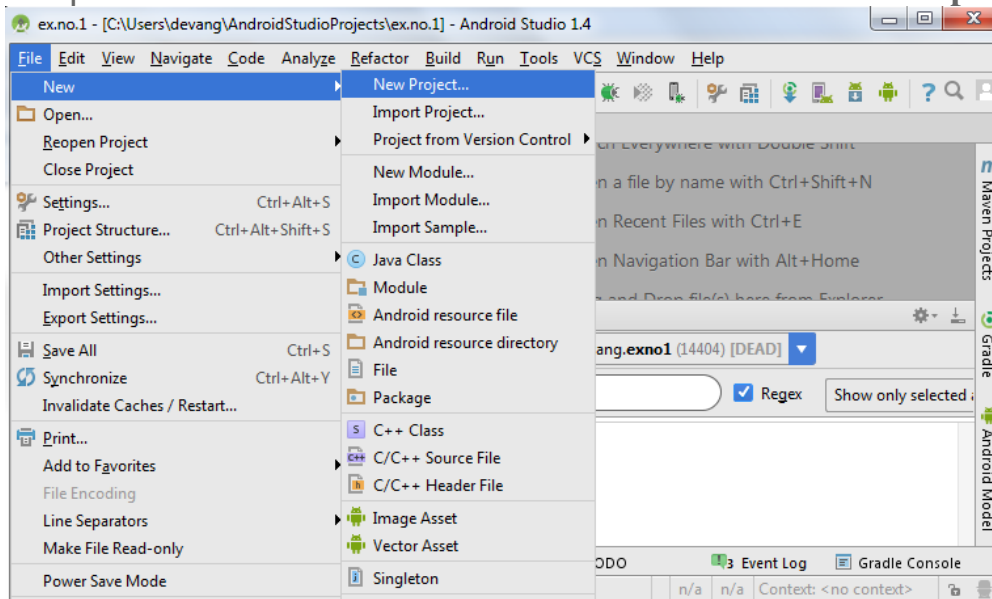

Aim:

To develop a Simple Android Application that uses Layout Managers and Event Listeners.

Procedure:

Creating a New project:

- Open Android Stdio and then click on **File -> New -> New project**.

- Then type the Application name as **“week-3”** and click **Next**.

Create New Project

New Project

Android Studio

Configure your new project

Application name:

Company Domain:

Package name: [Edit](#)

Project location: [Browse](#)

The application name for most apps begins with an uppercase letter

[Previous](#) [Next](#) [Cancel](#) [Finish](#)

- Then select the **Minimum SDK** as shown below and click Next.

Create New Project

Target Android Devices

Select the form factors your app will run on

Different platforms may require separate SDKs

☒ Phone and Tablet
Minimum SDK:

☐ Wear
Minimum SDK:

☐ TV
Minimum SDK:

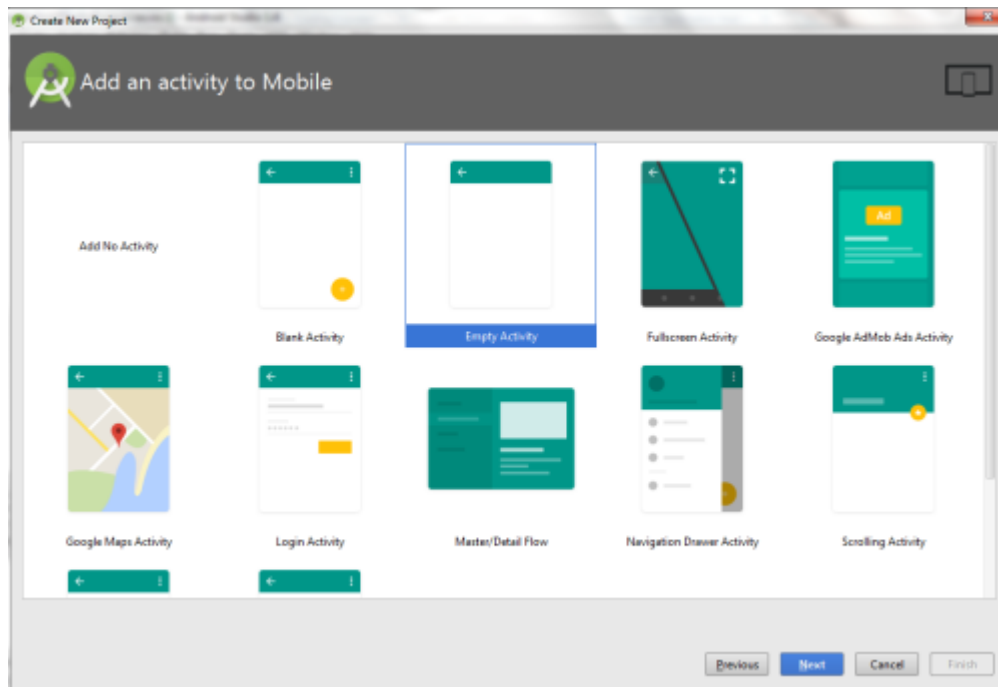

☐ Android Auto
Minimum SDK:

☐ Glass (Not Installed)
Minimum SDK:

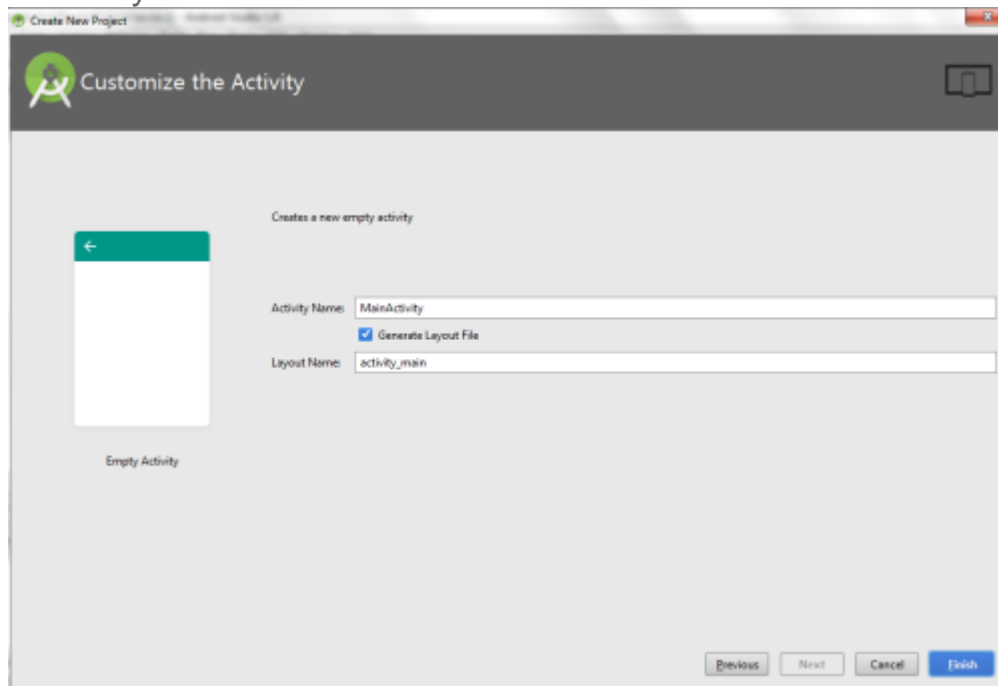

Lower API levels target more devices, but have fewer features available. By targeting API 15 and later, your app will run on approximately 94.0% of the devices that are active on the Google Play Store.
[Help me choose](#)

[Previous](#) [Next](#) [Cancel](#) [Finish](#)

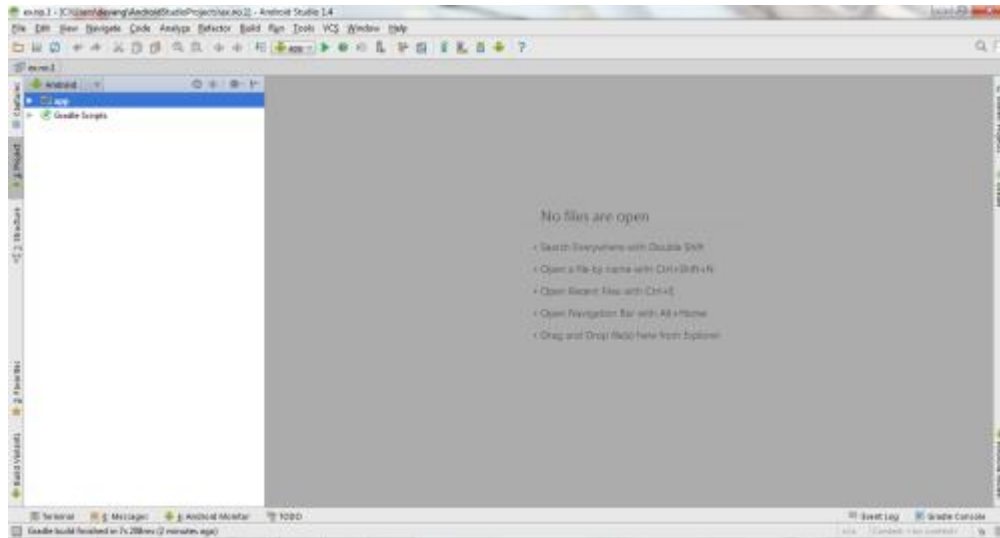

- Then select the **Empty Activity** and click Next.

- Finally click **Finish**.

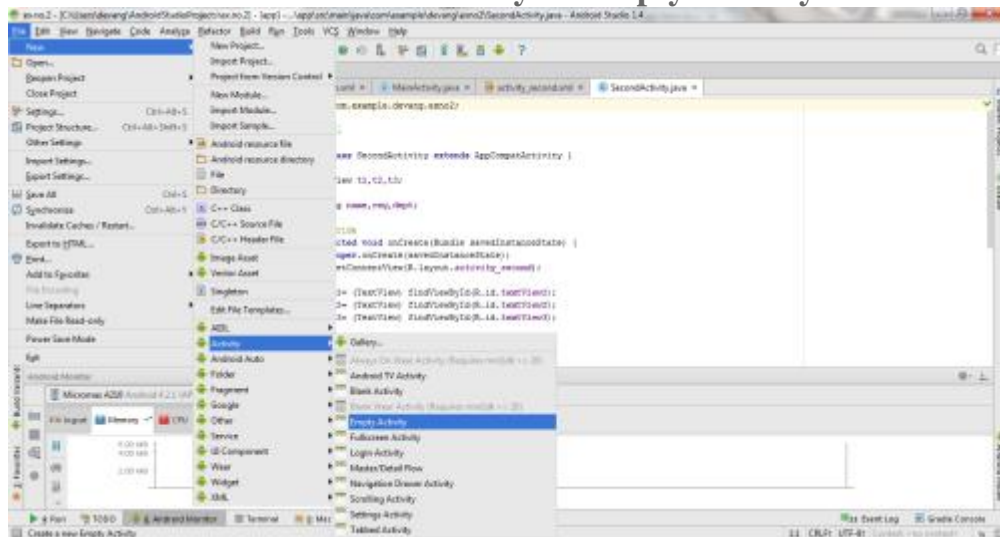

- It will take some time to build and load the project.
- After completion it will look as given below.

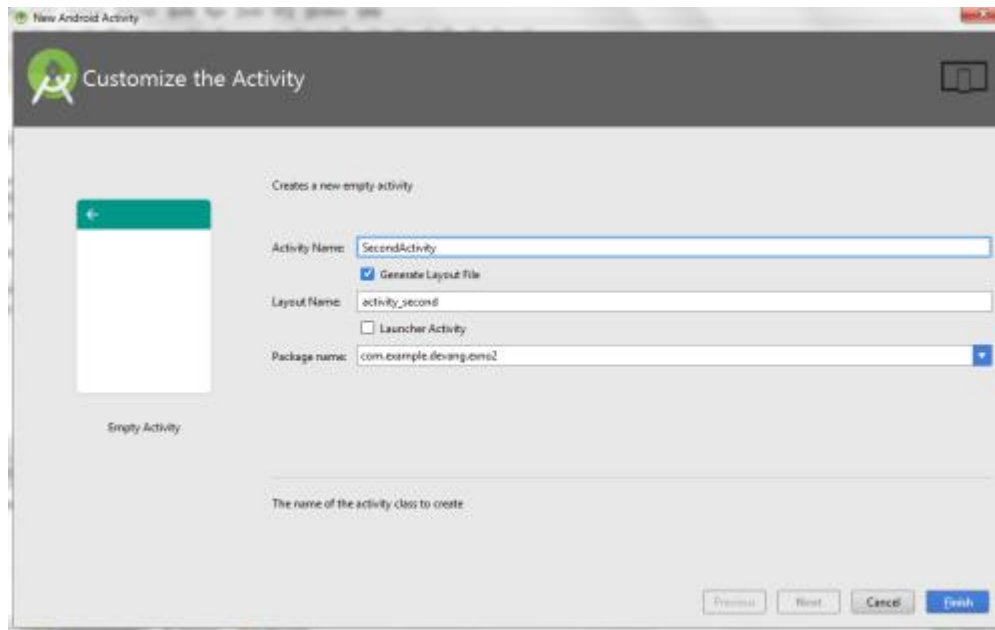

Creating Second Activity for the Android Application:

- Click on **File -> New -> Activity -> Empty Activity**.

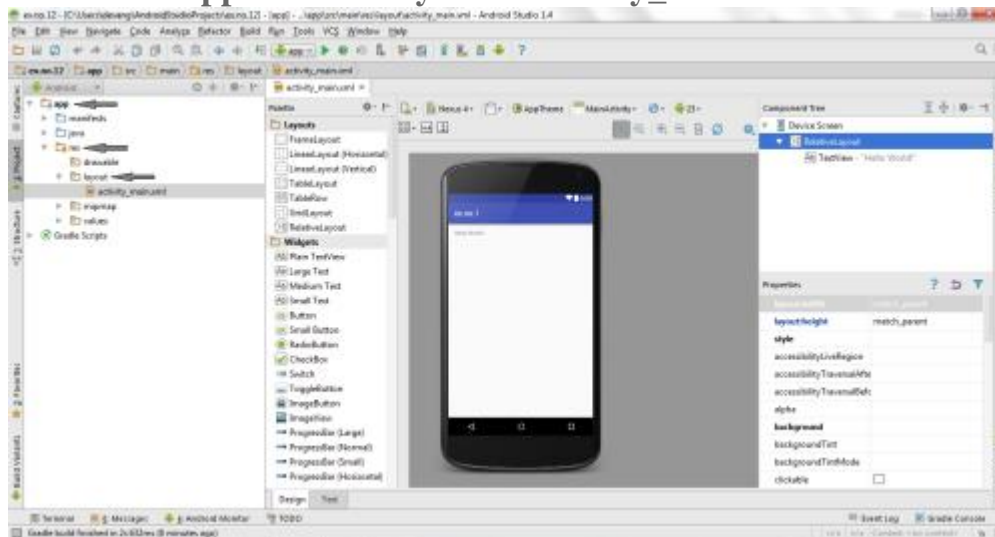

- Type the Activity Name as **SecondActivity** and click **Finish** button.

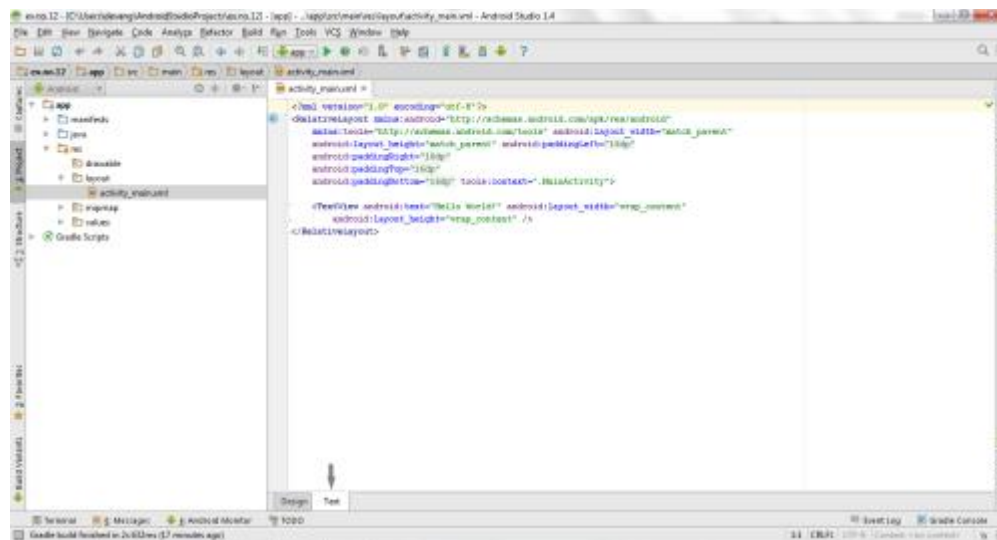

- Thus Second Activity For the application is created.

Designing layout for the Android Application: Designing Layout for Main Activity:

- Click on app -> res -> layout -> activity_main.xml.

- Now click on **Text** as shown below.

- Then delete the code which is there and type the code as given below.

Code for Activity_main.xml:

```

1 <?xml version="1.0" encoding="utf-8"?>
2 <RelativeLayout
3     xmlns:android="http://schemas.android.com/apk/res/android"
4     xmlns:tools="http://schemas.android.com/tools"
5     android:layout_width="match_parent"
6     android:layout_height="match_parent"
7     tools:context=".MainActivity">
8
9     <LinearLayout
10         android:layout_width="match_parent"
11         android:layout_height="100dp">
12         <TextView
13             android:id="@+id/textView"
14             android:layout_width="match_parent"
15             android:layout_height="wrap_content"
16             android:layout_margin="30dp"
17             android:text="Details Form"
18             android:textSize="25sp"
19             android:gravity="center"/>
20     </LinearLayout>
21
22     <GridLayout
23         android:id="@+id/gridLayout"
24         android:layout_width="match_parent"
25         android:layout_height="match_parent"
26         android:layout_marginTop="100dp"
27         android:layout_marginBottom="200dp"
28         android:columnCount="2"
29         android:rowCount="3">
30         <TextView
31             android:id="@+id/textView1"
32             android:layout_width="wrap_content"
33             android:layout_height="wrap_content"

```

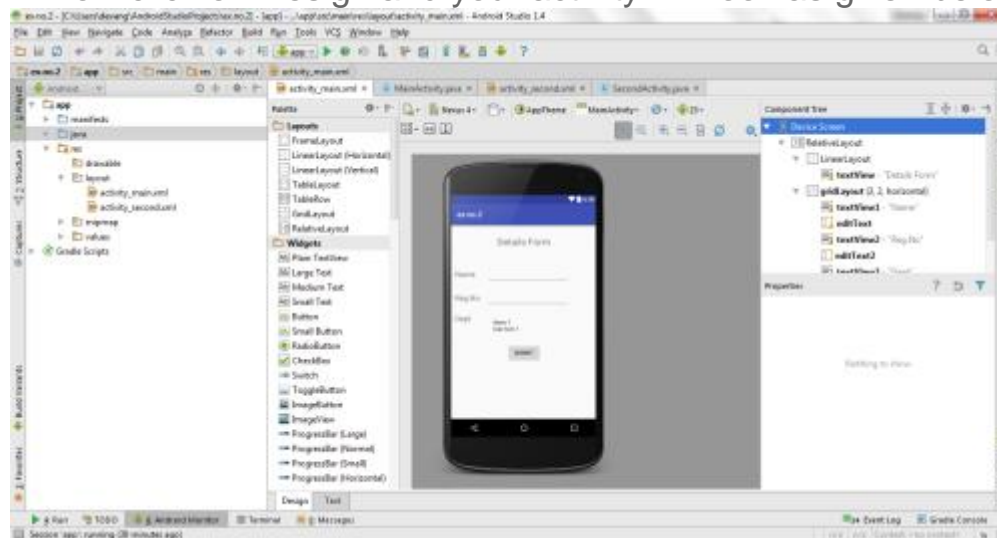

```
34         android:layout_margin="10dp"
35         android:layout_row="0"
36         android:layout_column="0"
37         android:text="Name"
38         android:textSize="20sp"
39         android:gravity="center"/>
40
41     <EditText
42         android:id="@+id/editText"
43         android:layout_width="wrap_content"
44         android:layout_height="wrap_content"
45         android:layout_margin="10dp"
46         android:layout_row="0"
47         android:layout_column="1"
48         android:ems="10"/>
49
50     <TextView
51         android:id="@+id/textView2"
52         android:layout_width="wrap_content"
53         android:layout_height="wrap_content"
54         android:layout_margin="10dp"
55         android:layout_row="1"
56         android:layout_column="0"
57         android:text="Reg.No"
58         android:textSize="20sp"
59         android:gravity="center"/>
60
61     <EditText
62         android:id="@+id/editText2"
63         android:layout_width="wrap_content"
64         android:layout_height="wrap_content"
65         android:layout_margin="10dp"
66         android:layout_row="1"
67         android:layout_column="1"
68         android:inputType="number"
69         android:ems="10"/>
70
71     <TextView
72         android:id="@+id/textView3"
73         android:layout_width="wrap_content"
74         android:layout_height="wrap_content"
75         android:layout_margin="10dp"
76         android:layout_row="2"
77         android:layout_column="0"
78         android:text="Dept"
79         android:textSize="20sp"
80         android:gravity="center"/>
81
82     <Spinner
83         android:id="@+id/spinner"
84         android:layout_width="wrap_content"
85         android:layout_height="wrap_content"
86         android:layout_margin="10dp"
87         android:layout_row="2"
```

```

88         android:layout_column="1"
89         android:spinnerMode="dropdown"/>
90
91     </GridLayout>
92
93     <Button
94         android:id="@+id/button"
95         android:layout_width="wrap_content"
96         android:layout_height="wrap_content"
97         android:layout_alignParentBottom="true"
98         android:layout_centerInParent="true"
99         android:layout_marginBottom="150dp"
100        android:text="Submit"/>
101
102 </RelativeLayout>

```

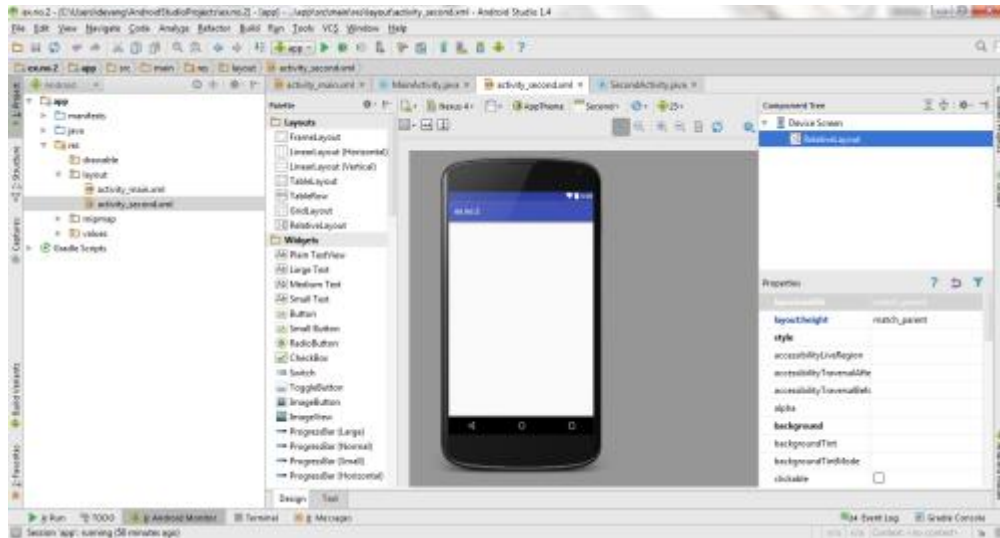

- Now click on Design and your activity will look as given below.

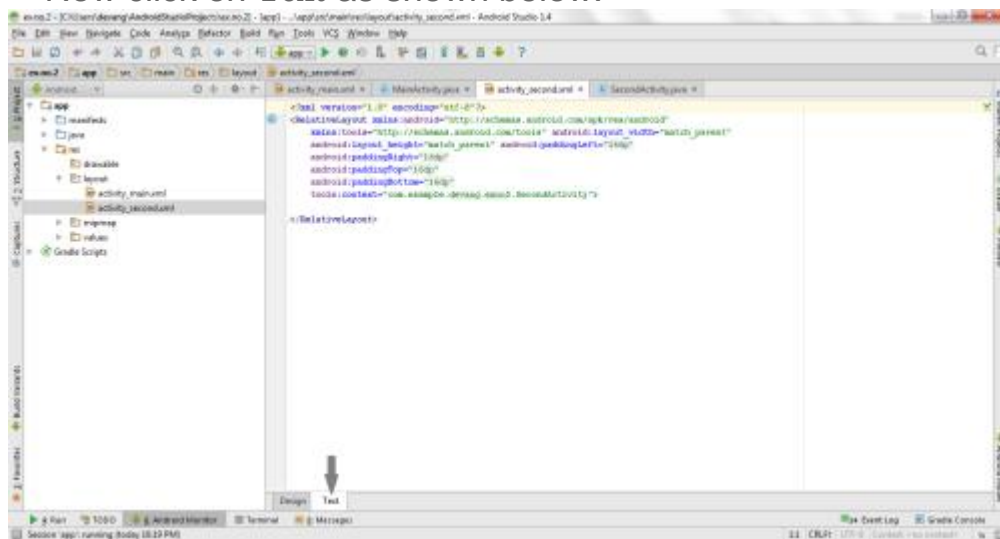

- So now the designing part of Main Activity is completed.

Designing Layout for Second Activity:

- Click on **app -> res -> layout -> activity_second.xml**.

- Now click on **Text** as shown below.

- Then delete the code which is there and type the code as given below.

Code for Activity_second.xml:

?

```
<?xml version="1.0" encoding="utf-8"?>
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context="com.example.devang.exno2.SecondActivity"
    android:orientation="vertical"
    android:gravity="center">

    <TextView
        android:id="@+id/textView1"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_margin="20dp"
        android:text="New Text"
        android:textSize="30sp"/>
```

```
<TextView
    android:id="@+id/textView2"
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:layout_margin="20dp"
    android:text="New Text"
    android:textSize="30sp"/>
```

```
<TextView
    android:id="@+id/textView3"
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:layout_margin="20dp"
    android:text="New Text"
    android:textSize="30sp"/>
```

```
</LinearLayout>
```

- Now click on Design and your activity will look as given below.

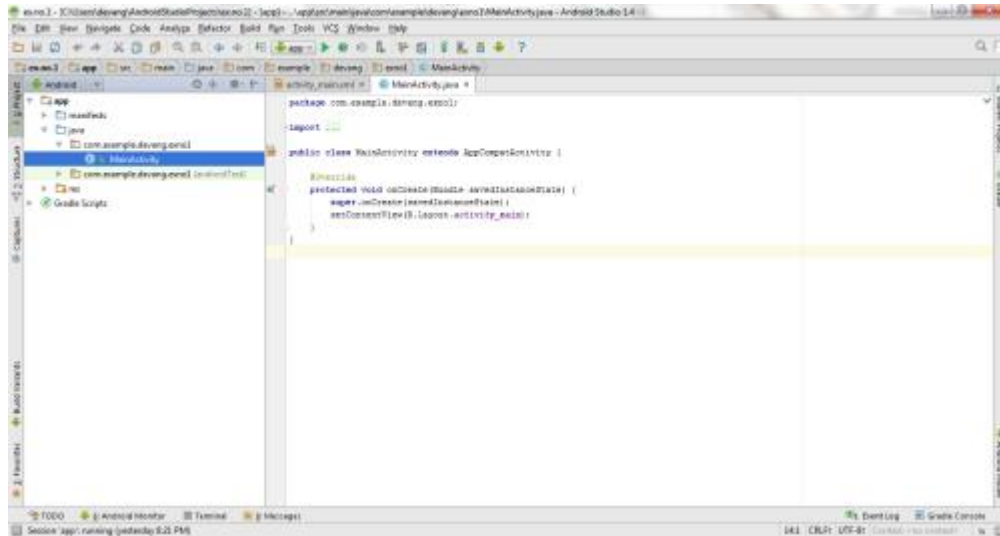

- So now the designing part of Second Activity is also completed.

Java Coding for the Android Application:

Java Coding for Main Activity:

- Click on app -> java -> com.example.exno2 -> MainActivity.

- Then delete the code which is there and type the code as given below.

Code for MainActivity.java:

?

```
package com.example.exno2;

import android.content.Intent;
import android.support.v7.app.AppCompatActivity;
import android.os.Bundle;
import android.view.View;
import android.widget.ArrayAdapter;
import android.widget.Button;
import android.widget.EditText;
import android.widget.Spinner;

public class MainActivity extends AppCompatActivity {

    //Defining the Views
    EditText e1,e2;
    Button bt;
    Spinner s;

    //Data for populating in Spinner
    String [] dept_array={"CSE","ECE","IT","Mech","Civil"};

    String name,reg,dept;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);

        //Referring the Views
        e1= (EditText) findViewById(R.id.editText);
        e2= (EditText) findViewById(R.id.editText2);

        bt= (Button) findViewById(R.id.button);

        s= (Spinner) findViewById(R.id.spinner);

        //Creating Adapter for Spinner for adapting the data from array to Spinner
        ArrayAdapter adapter= new
        ArrayAdapter(MainActivity.this,android.R.layout.simple_spinner_item,dept_array);
        s.setAdapter(adapter);
    }
}
```

```

//Creating Listener for Button
bt.setOnClickListener(new View.OnClickListener() {
    @Override
    public void onClick(View v) {

        //Getting the Values from Views(Edittext & Spinner)
        name=e1.getText().toString();
        reg=e2.getText().toString();
        dept=s.getSelectedItem().toString();

        //Intent For Navigating to Second Activity
        Intent i = new Intent(MainActivity.this,SecondActivity.class);

        //For Passing the Values to Second Activity
        i.putExtra("name_key", name);
        i.putExtra("reg_key",reg);
        i.putExtra("dept_key", dept);

        startActivity(i);

    }
});
}
}

```

- So now the Coding part of Main Activity is completed.

Java Coding for Second Activity:

- Click on app -> java -> com.example.exno2 -> SecondActivity.

- Then delete the code which is there and type the code as given below.

Code for SecondActivity.java:

```

package com.example.exno2;

import android.content.Intent;
import android.support.v7.app.AppCompatActivity;
import android.os.Bundle;
import android.widget.TextView;

public class SecondActivity extends AppCompatActivity {

```

```

TextView t1,t2,t3;

String name,reg,dept;

@Override
protected void onCreate(Bundle savedInstanceState) {
    super.onCreate(savedInstanceState);
    setContentView(R.layout.activity_second);

    t1= (TextView) findViewById(R.id.textView1);
    t2= (TextView) findViewById(R.id.textView2);
    t3= (TextView) findViewById(R.id.textView3);

    //Getting the Intent
    Intent i = getIntent();

    //Getting the Values from First Activity using the Intent received
    name=i.getStringExtra("name_key");
    reg=i.getStringExtra("reg_key");
    dept=i.getStringExtra("dept_key");

    //Setting the Values to Intent
    t1.setText(name);
    t2.setText(reg);
    t3.setText(dept);
}
}

```

-
- So now the Coding part of Second Activity is also completed.
 - Now run the application to see the output.

Output:

ex.no.2

Details Form

Name

Reg.No

Dept CSE ▾

SUBMIT

ex.no.2

Details Form

Name devang

Reg.No 111512104049
